## Profile

I am a full stack app/web developer. I am working in the technology field since 2005 with my primary focus on asp.net stack, however this changed over the past years with the rise of javascript frameworks, node and new other kids in the block. I find myself spending more time nowadays on a terminal window than visual studio and when it comes to databases I am moving my stuff to PostgreSQL.

- solid experience with Microsoft technologies like, C#, ASP.NET and SQL Server, Angular, Microservices, Restful API's, dependency injection, unit testing and mocking frameworks
- familiar with web technologies, like HTML, CSS, and JavaScript frameworks;
- knowledge of Agile and Scrum processes
- building distributed internet applications
- experience with full lifecycle - design, development, delivery, testing, documentation, support & maintenance
- experience of solving performance issues and performance tuning

## Skills

C#, Java, ASP(.net, MVC), php, MsSQL, PostgreSQL, nHibernate, EF, XML Web Services, Com/DCom/Com+, javascript (node, angular, meteor, react)

## Certification

Microsoft Certified Solution Developer (MCSD) 2002-2004
